## **DETAILED ACTION**

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Great Britain on 13 November 2002. It is noted, however, that applicant has not filed a certified copy of the document application as required by 35 U.S.C. 119(b).

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 16 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant claims the adaption to be inflated, yet fails to disclose how such a keel is so adapted. Without complete and adequate disclosure of the invention, one of ordinary skill in the art could not make and/or use the invention.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-10,13-15,23 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Madison.

Application/Control Number: 10/535,077

Art Unit: 3617

Madison discloses the claimed invention, including an elongate keel member having a mounting formation on the upper end for slidable mating with a mounting formation on the hull underside. The keel is constructed of a plastic material, and therefore is inherently compressible upwardly upon impact. A "tip" is provided throughout the length.

Re claims 2 and 7, even though Madison teaches the extrusion of the keel and its respective mounting element, such is method of making, carrying no weight in the claims.

6. Claims 1-3,5,12,15 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Glass.

Glass provides a rubber extruded keel element as claimed. The upper rounded portion constitutes the "mounting formation", for replaceable mounting within a complimentary hull channel. Glass discusses a foam-filled embodiment.

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Madison in view of Denker.

Madison fails to disclose the canoe being amphibious.

Denker teaches same.

Application/Control Number: 10/535,077

Art Unit: 3617

It would have been obvious to one of ordinary skill in the art at the time of the invention to provide for the amphibious operation of the canoe of Madison as taught by Denker.

Such a combination would have been desirable so as to permit ease in handling on land.

9. Claims 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Madison in view of Denker.

Madison and Denker are combined as above.

10. Claims 20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Madison in view of Denker as applied to claim 19 above, and further in view of Honatzis.

Madison fails to disclose a cap.

Honatzis teaches a "tip" for closing a channel, and a cap 34 extending thereover.

It would have been obvious to one of ordinary skill in the art at the time of the invention to close the end of the open channel of Madison with a tip and cap as taught by Honatzis.

Such a combination would have been desirable, so as a smooth transition between hull and keel is provided. Construction of the cap from metal would have been within the level of skill of the ordinary routineer working in the art, and therefore obvious.

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Schad teaches slidably inserted members retained in place by a metal cap.

Fries teaches an inflatable keel.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ed Swinehart whose telephone number is 571-272-6688. The examiner can normally be reached on Monday through Thursday 6:30 am to 2:00 pm..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Samuel Morano can be reached on 571-272-6684. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
